

**GAS APPLIANCES**  
**TECHNICAL GUIDANCE BULLETIN**

**Bulletin Number:** 30  
**Bulletin Date:** 19 June 2025  
**Product Type:** Domestic Cookers  
**Relevant Standard(s):** AS/NZS 5263.1.1:2020 Domestic Gas Cooking Appliances  
**Relevant Clause(s)** Clause 5.4.8  
**Subject:** Requirements for domestic cookers with air circulating fans.

**Guidance to be provided:**

**Requirements of AS5263.1.1:2020 are to be modified as follows:**

New Clause:

**Clause 5.4.8 Additional temperature limits for appliances with air circulating fans.**

**Not applicable**

---

**Reason:**

A new temperature test was included in AS/NZS5263.0:2023. This test assesses operation under various conditions for appliances with cooling fans. AG-001 has advised that this test will not be applied to domestic cooking appliances, and an alternative test is being developed under AS/NZS5263.1.1. As a result, compliance with Clause 5.4.8 in AS/NZS5263.0:2023 is not required.

**Action:**

Conformity assessment bodies are to note that the new requirements in Clause 5.4.8 are not applicable when assessing domestic cookers for certification using AS/NZS5263.0:2023.

**Transition:**

Immediate.

**Proposed Revision to Standard:**

The standard AS/NZS5263.1.1 will be revised to consider the above issue, at which time the requirements of the standard will apply and will supersede this bulletin.

This bulletin provides technical guidance from the Gas Technical Regulators to Conformity Assessment Bodies that are JASANZ accredited for the certification of gas appliances required to comply with AS3645. This technical guidance is provided where the technical requirements or test methodologies from current technical standards are inadequate or can be misinterpreted. This bulletin is valid until such time as the relevant technical standard is revised or amended accordingly.
